Owner-occupied housing units	371	70.3
Population in owner-occupied housing units	937	( X )
Average household size of owner-occupied units	2.53	( X )
Renter-occupied housing units	157	29.7
Population in renter-occupied housing units	327	( X )
Average household size of renter-occupied units	2.08	( X )

X Not applicable.

[1] Other Asian alone, or two or more Asian categories.

[2] Other Pacific Islander alone, or two or more Native Hawaiian and Other Pacific Islander categories.

[3] One of the four most commonly reported multiple-race combinations nationwide in Census 2000.

[4] In combination with one or more of the other races listed. The six numbers may add to more than the total population, and the six percentages may add to more than 100 percent because individuals may report more than one race.

[5] This category is composed of people whose origins are from the Dominican Republic, Spain, and Spanish-speaking Central or South American countries. It also includes general origin responses such as "Latino" or "Hispanic."

[6] "Spouse" represents spouse of the householder. It does not reflect all spouses in a household. Responses of "same-sex spouse" were edited during processing to "unmarried partner."

[7] "Family households" consist of a householder and one or more other people related to the householder by birth, marriage, or adoption. They do not include same-sex married couples even if the marriage was performed in a state issuing marriage certificates for same-sex couples. Same-sex couple households are included in the family households category if there is at least one additional person related to the householder by birth or adoption. Same-sex couple households with no relatives of the householder present are tabulated in nonfamily households. "Nonfamily households" consist of people living alone and households which do not have any members related to the householder.

[8] The homeowner vacancy rate is the proportion of the homeowner inventory that is vacant "for sale." It is computed by dividing the total number of vacant units "for sale only" by the sum of owner-occupied units, vacant units that are "for sale only," and vacant units that have been sold but not yet occupied; and then multiplying by 100.

[9] The rental vacancy rate is the proportion of the rental inventory that is vacant "for rent." It is computed by dividing the total number of vacant units "for rent" by the sum of the renter-occupied units, vacant units that are "for rent," and vacant units that have been rented but not yet occupied; and then multiplying by 100.

SELECTED SOCIAL CHARACTERISTICS IN THE UNITED STATES

2007-2011 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

2007-2011 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	Wilson village, New York			
	Estimate	Margin of Error	Percent	Percent Margin of Error
<b>EMPLOYMENT STATUS</b>				
Population 16 years and over	961	+/-115	961	(X)
In labor force	611	+/-101	63.6%	+/-5.1
Civilian labor force	608	+/-102	63.3%	+/-5.2
Employed	563	+/-102	58.6%	+/-5.9
Unemployed	45	+/-22	4.7%	+/-2.3
Armed Forces	3	+/-4	0.3%	+/-0.5
Not in labor force	350	+/-51	36.4%	+/-5.1
Civilian labor force	608	+/-102	608	(X)
Percent Unemployed	(X)	(X)	7.4%	+/-3.7
<b>Females 16 years and over</b>				
In labor force	280	+/-55	55.8%	+/-7.0
Civilian labor force	280	+/-55	55.8%	+/-7.0
Employed	273	+/-54	54.4%	+/-6.9
<b>Own children under 6 years</b>				
All parents in family in labor force	10	+/-10	14.7%	+/-16.5
<b>Own children 6 to 17 years</b>				
All parents in family in labor force	96	+/-39	55.2%	+/-18.2
<b>COMMUTING TO WORK</b>				
Workers 16 years and over	520	+/-100	520	(X)
Car, truck, or van -- drove alone	433	+/-105	83.3%	+/-7.0
Car, truck, or van -- carpooled	38	+/-20	7.3%	+/-4.0
Public transportation (excluding taxicab)	0	+/-89	0.0%	+/-6.1
Walked	5	+/-8	1.0%	+/-1.5
Other means	17	+/-17	3.3%	+/-3.4
Worked at home	27	+/-15	5.2%	+/-3.3
Mean travel time to work (minutes)	27.9	+/-3.7	(X)	(X)
<b>OCCUPATION</b>				
Civilian employed population 16 years and over	563	+/-102	563	(X)

Subject	Wilson village, New York			
	Estimate	Margin of Error	Percent	Percent Margin of Error
Management, business, science, and arts occupations	212	+/-62	37.7%	+/-7.5
Service occupations	67	+/-29	11.9%	+/-5.4
Sales and office occupations	130	+/-51	23.1%	+/-6.9
Natural resources, construction, and maintenance occupations	68	+/-31	12.1%	+/-4.7
Production, transportation, and material moving occupations	86	+/-38	15.3%	+/-7.0
<b>INDUSTRY</b>				
Civilian employed population 16 years and over	563	+/-102	563	(X)
Agriculture, forestry, fishing and hunting, and mining	0	+/-89	0.0%	+/-5.6
Construction	60	+/-27	10.7%	+/-3.9
Manufacturing	68	+/-32	12.1%	+/-5.6
Wholesale trade	17	+/-18	3.0%	+/-3.2
Retail trade	47	+/-28	8.3%	+/-4.6
Transportation and warehousing, and utilities	47	+/-24	8.3%	+/-4.3
Information	17	+/-18	3.0%	+/-2.9
Finance and insurance, and real estate and rental and leasing	28	+/-20	5.0%	+/-3.5
Professional, scientific, and management, and administrative and waste management services	24	+/-14	4.3%	+/-2.6
Educational services, and health care and social assistance	173	+/-51	30.7%	+/-6.5
Arts, entertainment, and recreation, and accommodation and food services	38	+/-26	6.7%	+/-4.6
Other services, except public administration	12	+/-11	2.1%	+/-2.0
Public administration	32	+/-19	5.7%	+/-3.3
<b>CLASS OF WORKER</b>				
Civilian employed population 16 years and over	563	+/-102	563	(X)
Private wage and salary workers	457	+/-96	81.2%	+/-6.3
Government workers	94	+/-36	16.7%	+/-6.2
Self-employed in own not incorporated business workers	12	+/-10	2.1%	+/-1.8
Unpaid family workers	0	+/-89	0.0%	+/-5.6
<b>INCOME AND BENEFITS (IN 2011 INFLATION-ADJUSTED DOLLARS)</b>				
Total households	496	+/-45	496	(X)
Less than \$10,000	20	+/-11	4.0%	+/-2.3
\$10,000 to \$14,999	22	+/-15	4.4%	+/-3.0
\$15,000 to \$24,999	67	+/-27	13.5%	+/-5.2
\$25,000 to \$34,999	17	+/-11	3.4%	+/-2.2
\$35,000 to \$49,999	84	+/-33	16.9%	+/-6.4
\$50,000 to \$74,999	96	+/-34	19.4%	+/-6.8
\$75,000 to \$99,999	99	+/-35	20.0%	+/-6.8
\$100,000 to \$149,999	52	+/-21	10.5%	+/-4.0
\$150,000 to \$199,999	20	+/-14	4.0%	+/-2.8
\$200,000 or more	19	+/-19	3.8%	+/-3.9
Median household income (dollars)	55,556	+/-11,032	(X)	(X)
Mean household income (dollars)	70,620	+/-11,048	(X)	(X)
<b>With earnings</b>				
Mean earnings (dollars)	72,935	+/-14,010	(X)	(X)

All people	(X)	(X)	16.7%	+/-8.1
Under 18 years	(X)	(X)	34.8%	+/-21.2
Related children under 18 years	(X)	(X)	28.1%	+/-21.9
Related children under 5 years	(X)	(X)	46.2%	+/-48.0
Related children 5 to 17 years	(X)	(X)	23.4%	+/-18.6
18 years and over	(X)	(X)	11.2%	+/-4.4
18 to 64 years	(X)	(X)	11.6%	+/-5.1
65 years and over	(X)	(X)	9.5%	+/-8.2
People in families	(X)	(X)	14.2%	+/-10.1
Unrelated individuals 15 years and over	(X)	(X)	24.0%	+/-11.2

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

There were changes in the edit between 2009 and 2010 regarding Supplemental Security Income (SSI) and Social Security. The changes in the edit loosened restrictions on disability requirements for receipt of SSI resulting in an increase in the total number of SSI recipients in the American Community Survey. The changes also loosened restrictions on possible reported monthly amounts in Social Security income resulting in higher Social Security aggregate amounts. These results more closely match administrative counts compiled by the Social Security Administration.

Workers include members of the Armed Forces and civilians who were at work last week.

Industry codes are 4-digit codes and are based on the North American Industry Classification System 2007. The Industry categories adhere to the guidelines issued in Clarification Memorandum No. 2, "NAICS Alternate Aggregation Structure for Use By U.S. Statistical Agencies," issued by the Office of Management and Budget.

Census occupation codes are 4-digit codes and are based on the Standard Occupational Classification (SOC). The Census occupation codes for 2010 and later years are based on the 2010 revision of the SOC. To allow for the creation of 2007-2011 and 2009-2011 tables, occupation data in the multiyear files (2007-2011 and 2009-2011) were recoded to 2011 Census occupation codes. We recommend using caution when comparing data coded using 2011 Census occupation codes with data coded using Census occupation codes prior to 2010. For more information on the Census occupation code changes, please visit our website at <http://www.census.gov/hhes/www/oiindex/>.

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2007-2011 American Community Survey

Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

<b>GROSS RENT AS A PERCENTAGE OF HOUSEHOLD INCOME (GRAPI)</b>				
Occupied units paying rent (excluding units where GRAPI cannot be computed)	108	+/-42	108	(X)
Less than 15.0 percent	42	+/-28	38.9%	+/-18.7
15.0 to 19.9 percent	28	+/-24	25.9%	+/-17.4
20.0 to 24.9 percent	2	+/-5	1.9%	+/-3.9
25.0 to 29.9 percent	5	+/-6	4.6%	+/-5.7
30.0 to 34.9 percent	6	+/-6	5.6%	+/-6.1
35.0 percent or more	25	+/-19	23.1%	+/-15.8
Not computed	6	+/-6	(X)	(X)

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

The median gross rent excludes no cash renters.

In prior years, the universe included all owner-occupied units with a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all owner-occupied units without a mortgage. It is now restricted to include only those units where SMOCAPI is computed, that is, SMOC and household income are valid values.

In prior years, the universe included all renter-occupied units. It is now restricted to include only those units where GRAPI is computed, that is, gross rent and household income are valid values.

The 2007, 2008, 2009, 2010, and 2011 plumbing data for Puerto Rico will not be shown. Research indicates that the questions on plumbing facilities that were introduced in 2008 in the stateside American Community Survey and the 2008 Puerto Rico Community Survey may not have been appropriate for Puerto Rico.

Median calculations for base table sourcing VAL, MHC, SMOC, and TAX should exclude zero values.

While the 2007-2011 American Community Survey (ACS) data generally reflect the December 2009 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic

entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2000 data. Boundaries for urban areas have not been updated since Census 2000. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '\*\*\*' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '\*\*\*\*' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '\*\*\*\*\*' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.
